# ***INSTALLATION MANUAL***
Safety tips before starting

*Let always an expert/authorized technician make the installation.

*Before you start please shut off the power to prevent electric shock.

*The products with energetic class II do not require the Earth / Ground connection so please do not connect the neutral if is not required. Instead, if the item is class energetic I, please do connect the neutral to Earth.

*Consider always to leave some space for the heat sink of the led device, it need it to cool down after use

*Do not connect any Led device without its recommended driver

*Your individual product may vary from the design shown in the pictures

*Do not disassemble your product

*If any modification is made in the item or any wrong installation cause any damage to it, the warranty will be invalidated.

1. Fix the back housing on the wall or ceiling by screws.

L = UNSWITCHED
L' = SWITCHED
N = NEUTRAL
⏚ = GROUND WIRE

2. Choose the color temperature with DIP switch if it's the color changeable version (trio CCT), then connect the wires well.

3. Connect the DC plug(if with Emergency , connect the plugs between the battery and driver), put back the cover to the back plate and fix it by screws

4. Buckle the frame back and fix it by proper tools.

Thanks for your purchase !
